Google App Engine File

An App Engine PHP app must use the Cloud Storage stream wrapper to write files at runtime. However, if an app needs to read files, and these files are static, you can optionally read static files uploaded with your app using PHP filesystem functions such as `file_get_contents`.

Reading and Writing Files | App Engine standard ...

This document describes how to store and retrieve data using Cloud Storage in an App Engine app using the Google Cloud Storage client library. It assumes that you completed the tasks described in Setting Up for Google Cloud Storage to activate a Cloud Storage bucket and download the client libraries.

Reading and Writing to Google Cloud Storage | App Engine ...

All files in this directory are uploaded with your app as static files. App Engine stores and serves static files separately from your app's files. Static files are not available in the app's file system by default. This can be changed by setting the `application_readable` option to true. Example:

app.yaml Reference | App Engine standard environment for ...

Package `com.google.appengine.api.files`. `FileService` Deprecated This api has been deprecated in favor of the App Engine GCS client. `FileServiceFactory` Deprecated This api has been deprecated in favor of the App Engine GCS client. `GSFileOptions`. `GSFileOptionsBuilder` A builder of `GSFileOptions`. `AppEngineFile.FileSystem` Represents the back-end storage location of a file.

com.google.appengine.api.files (Google App Engine API for ...

Google App Engine allows you to serve SSL (HTTPS) traffic through your `appspot.com` domain. Simply add the 'secure' parameter to your `app.yaml` handler for the URLs through which you wish to support secure traffic. For complete information on how to configure your application for secure traffic,...

Google App Engine FAQ | App Engine Documentation | Google ...

Configuration Files. Optional application-level configuration files (`dispatch.yaml`, `cron.yaml`, `index.yaml`, and `queue.yaml`) are included in the top level app directory. The example below shows three services. In `service1` and `service2`, the source files are at the same level as the YAML file. In `service3`, there are YAML files for two versions.

Configuration Files | App Engine standard environment for ...

When the file write is complete, App Engine notifies your app that the upload is complete. Because your app is invoked only upon completion, you can use this method to upload very large files, up to the current maximum of 100 Terabytes. User upload of files directly to Google Cloud Storage is faster and more cost-effective than writing to ...

Allowing Users to Upload Files | App Engine standard ...

Setting `google_app_engine.disable_readonly_filesystem` to 1 in your `php.ini` file should lift this restriction albeit only for your development environment. Barring this, the issue may Barring this, the issue may

Google App Engine & PHP write file - Stack Overflow

An App Engine application cannot: Reading from the filesystem is allowed, and all application files uploaded with the application are available. open a socket or access another host directly. An application can use the App Engine URL fetch service to make HTTP and HTTPS requests to other hosts on ports 80 and 443, respectively.
