Steam has a built-in system for making a backup of its game files, so you don't have to re-download a full game every time you uninstall it and want to play again later. But like a lot of Steam's features, it hasn't been updated in quite a while, and frankly it often manages to break the game restoration process anyway. On top of that, it's slow, it's clunky, and you can do better on ...
