Engine/frame numbers Engine and frame numbers are key to ascertaining which model the bike was originally, and what year it left the factory. Unlike Triumphs, for example, the numbers do not match (except on military machines), so you can't use them to check whether you're looking at an original engine and frame that left the factory together.

Velocette 'K' series. In the early 1920s, Veloce realized that in order to grow as a company, it

needed a new machine of advanced specification and developed an overhead camshaft (OHC) 350 cc engine, which became known as the 'K' series, introduced in 1925. After a year of teething troubles with this new design,...

Velocette - Wikipedia

Velocette built engines and frames separately, kept them in the stores and eventually built them into a machine. Therefore there is no direct or logical relationship between engine and frame numbers. It is not unusual for an engine to have a much later frame than the next engine in the numeric sequence or vice versa.
