Some Harley engines (with hydraulic lifters) have valve noise, and it drives some guys crazy trying to find the source of the noise. But most stock engines are pretty quiet. I would expect a Sportster engine to be quieter than a big twin, because the sporty does not have the wacky angles of the pushrods like a big twin.

There is no denying that a Harley-Davidson motorcycle has a unique sound, especially if the mufflers have been removed! Even with the mufflers on, however, it sounds different from other motorcycles. The reason for the sound has to do with the way the engine is designed. If you have read the HowStuffWorks article How Car Engines Work, then you know how a basic four-stroke gasoline engine operates.
