Basically, our results suggest that we can use bias in favor of the status quo to actually change the status quo. When there was only one woman or minority candidate in a pool of four finalists ...

If There's Only One Woman in Your Candidate Pool, There's ...

Another key approach to mitigating bias is to combine interviews with direct observations. For example, in the study on goal-setting processes in family firms (Kotlar & De Massis, 2013), direct interviews were combined with non-participant observations. Specifically, informants were followed during family and business meetings (e.g., meetings of the board of directors, family meetings, and ...

Impact evaluations in the financial inclusion sector often attempt to measure the financial health of their participants. However, there is little consensus about what financial health consists of and how it should be measured, making it difficult to compare findings about financial health across studies.
