A simulation is an approximate imitation of the operation of a process or system; the act of simulating first requires a model is developed. This model is a well-defined description of the simulated subject, and represents its key characteristics, such as its behaviour, functions and abstract or physical properties.

In economics, general equilibrium theory attempts to explain the behavior of supply, demand, and prices in a whole economy with several or many interacting markets, by seeking to prove that the interaction of demand and supply will result in an overall general equilibrium. General equilibrium theory contrasts to the theory of partial equilibrium, which only analyzes single markets.

Symptoms. Before we can address the symptoms of PE, we should first define a commonly-used term related to premature ejaculation - the "intravaginal ejaculatory latency time" or IELT. IELT is the time from initial penetration to ejaculation, or, in more general terms, the length of time that sexual intercourse lasts.
