Documenting your geodatabase design is important. At the ArcGIS data models Web site (<http://support.esri.com/datamodels>), a series of diagrams is used to represent ...

Documenting your geodatabase design - Esri

ArcGIS Diagrammer is kaput after 10.2 and never was better than the other options in my opinion, and Geodatabase Diagrammer is awesome, but getting it to work is nightmare. Little documentation to work through all the bugs/install process and confusing blog entries and multiple versions makes what should be a simple process turn into a wasted day.

Seeking Esri tools to design geodatabase? - Geographic ...

Map layers—GIS includes interactive maps and other views. A critical part of each dataset is the specification for how it is symbolized and rendered in maps. These are typically defined as layer properties in ArcMap and specify how features are assigned map symbology (colors, fill patterns, line and point symbols) and text labels.

ArcGIS Help 10.1 - Documenting your geodatabase design

Geodatabase modeling. The geodatabase data model is an object-oriented data model for geographic data. To create blueprints of the objects, their relationships, and their behavior, you can use UML, a graphical modeling language. Utilize the CASE tools to create the storage medium (geodatabase schema) and object behavior (custom features and ...
