He also dispels the myth that cam timing suffers with chain drive, by reminding me that a Harley engine built for the street, should never get to that high an RPM where a gear drive is needed to keep cam timing in line . (The cases will have a problem at that high an RPM) Also, Harley cranks are supported by real roller bearings.

The 2012 HD Big Twin 103ci engine produces 100-ft-lbs of torque. The 2012 Kawasaki Vulcan 1700 with the same size engine produces 108-ft-lbs. Yes, the Harley is down a little, but not much, and the Kawasaki does that with 8 valves, the HD does it with 4 (not that you should brag about having fewer valves). So, HD is no Yamaha R1.

The ironhead sportster of the 70's & 80's was a horrible mechanical nightmare. Most of the problems stem from its solid mounted engine and poor electrics. Nearly every part of the electrical system was prone to failure. More like repeated failure....

I find it hard to believe the factor valve adjustment will last the life of the engine. Has Harley-Davidson created a miracle of no valve lash on solid lifters? We'll see. I hope it is true. Foreseeable Problem With Rocker Arms – When the engine is new the lifters, pushrods, rocker arms and valve stems will work just fine.

In fact, if it proves true that this was the problem at the York plant, it will have been the third time in as many years Harley has recalled its bikes for clutch problems. In 2013, Harley ...

If you think you are having issues with the new Milwaukee 8 engine, get it checked out as soon as possible. 2017 CVO Ltd Stage 4 sumping issue...HD shipping new design oil pump to dealer: <https://www.hondatwins.com/threads/2017-cvo-ltd-stage-4-sumping-issue-hd-shipping-new-design-oil-pump-to-dealer.102222/>

Harley experimented by using INA bearings in place of Torringtons on a few Shovelhead models and then converted totally to the INA with the Evolution. INA bearings have intermittently caused problems when used on the left side of the V-twin's camshaft(s). As such, wise engine builders replace the INA bearing with a B-148 Torrington.

Harley says rebuild them under warranty. Every single one, rods were bluer than blue. Harley rep asks what caused the failures, told him running light weight oil. Oh no, that couldnt be it. Hahahha, Got them boys using the right stuff. guess what, no problem from then on.

Harley-Davidson just released it's first all-new Big Twin engine in 17 years, the 8-valve Milwaukee Eight, last month. We heard great things about it, but we had to try it to see what all the fuss was about – and what better way to really see how it compares to the Twin Cam, than riding them both back-to-back!

I've been ridding for 50 years. Cut my teeth on Pans, Shovels and Evo's. In my opinion the Evolution engine is the best ever made by Harley Davidson. After that it seems to me Harley Davidson was forced to make engines for the Government EPA. Here comes computers, fuel injection, fuel pumps in the gas tanks, and an electric throttle.

11. Harley-Davidson Director of Styling Brad Richards on the aesthetics: "The Milwaukee-Eight engine is styled to project power. I compare it to the back of a swimmer, lean in the waist but ..."
