Summary This essay provides a brief summary of genetic engineering (GE) and considers some ethical issues raised by applications of GE to humans. GE is distinguished from novel reproductive technologies, such as cloning, which are not discussed. The doctrines of Creation, Fall and Redemption provide a Christian framework within which to evaluate the appropriate [...]

Genetic engineering: exploring its role in God's world by ...

Creationists often argue that evolutionary processes cannot create new information, or that evolution has no practical benefits. This article disproves those claims by describing the explosive growth and widespread applications of genetic algorithms, a computing technique based on principles of biological evolution.

Genetic Algorithms and Evolutionary Computation

Pseudogenes. Pseudogenes are DNA sequences that resemble functional genes but are generally thought to have no purpose. In fact many scientists think that pseudogenes are nothing more than discarded genetic fossils of a bygone era when they did have some sort of important function.

Human-competitive results produced by genetic programming

Oryx and Crake is a 2003 novel by Canadian author Margaret Atwood. She has described the novel as speculative fiction and adventure romance, rather than pure science fiction, because it does not deal with things "we can't yet do or begin to do", yet goes beyond the amount of realism she associates with the novel form. It focuses on a lone character called Snowman, who finds himself in a bleak ...

Oryx and Crake - Wikipedia

Criminal behavior has always been a focus for psychologists due to the age old debate between nature and nurture. Is it the responsibility of an individual's genetic makeup that makes them a criminal or is it the environment in which they are raised that determines their outcome?

Genes, Environment, and Criminal Behavior

An even more intriguing possibility involves making genetic changes at the embryonic stage, also known as germline editing. The logic is simple: alter the gene lines in an embryo's eight or 16 cell stage (to, say, eliminate the gene for Tay-Sachs disease) and that change will occur in each of the resulting person's trillions of cells – not to mention in the cells of their descendants.
