One of the things that we get faced with from time to time is the repair of crankcases. While the ideal solution would be to weld them, at times castings are either too thin or too oil-soaked (and therefore too full of impurities) to weld. Then they have to be cold-repaired. This week, we were faced with such a problem on a flange for a 1920 Silver Ghost crankcase which had, about 50 years ago ...
