2008-06-27 19:51:26 UTC #1. In my last post I asked what a "CC" is for a motorcycle. Someone responded with, "...any bike above 500 CC is going to be pretty darn fast compared to most cars.". My question is, i'm in the market for a new Harley Davidson. Their lowest CC is the 883 Sportster and they also have a 1200 cc.

Is 883 cc economic for a motorcycle? - Car Talk Community

Harley Davidson Engine Dimensions When it comes to motorcycles, perhaps the first name that comes to mind is Harley Davidson. The company has been manufacturing rugged riding machines for years, and beneath each new model is a powerful engine to keep it thundering through the streets and highways.

Harley Davidson Engine Dimensions

At 88 cubic inches (1,450 cc) of displacement, it is the largest production Harley motorcycle engine, and it produces 80 horsepower. The engine remains air-cooled, and uses overhead valves activated by pushrods. The 88B version of the engine, which came out in 2000, contains counterbalancing shafts to reduce engine vibration.
