I have a fedders furnace USA090NH3R. The burner limit circuit open light is flashing. The furnace does not fire up consistently on the first attempt. It will eventually fire but normally after several cycles. It has been doing this for quite a while but continues to heat the house but I am getting tired of hearing it cycle on an off.

Just put up a 1,200 sq ft workshop, 6" insulation in walls and ceiling, 18x10 insulated door, man door, and a couple of 2x3 windows. My father-in-law is giving me a 6 year gas furnace. I need to change this furnace over to propane, have no gas on my road. I'm trying to find out what parts I would need to make this change over. The only name I can find on this unit is Gama, has anyone ever ...
